ABSTRACT

During the 1976 fall term, the 39 public community college districts of Illinois reported a combined total of 2,959 educational curricula in 183 fields of study. Student enrollment numbered 344,601. Curriculum offerings ranged from 34 to 444 instructional programs at the district level, with enrollment varying from 1,347 in the smallest district to 108,782 in the largest. In the baccalaureate curricula (28% of enrollment), highest enrollments were in interdisciplinary studies (59,941), business (13,549), and education (5,721). Students enrolled in occupational studies (29%) included highs of 32,935 in business technology programs, 19,748 in mechanical and engineering technology programs, 16,434 in health service-paramedic studies, and 15,542 in public service related technology. The lowest total enrollment was 154 in home economics, offered by six colleges. Registered occupational nursing and police law enforcement had the highest single career program enrollments with 9,135 and 7,935 respectively. The document includes statistical data representing the distribution of students by instructional program areas, individual colleges, districts, and type of curricula (degree or certificate). (RT)

PREFACE

This report contains a summary of student enrollments in the various instructional program offerings in the Illinois Public Community Colleges for the Fall term of the 1976-77 academic year. Each instructional program is represented by an approved curriculum on file in the ICCB Curriculum Master File and is classified by the Higher Education General Information Survey (HEGIS) taxonomy. The community colleges report enrollments in each of its curricula to the ICCB on Curriculum Enrollment Cards (Z-Cards). The interface of these basic data subsystems permits the following analysis of the curricula (curriculums):

1. Curricula by HEGIS classification for the entire state showing the colleges that offer each particular curriculum and the number of students enrolled in that curriculum.

2. Curricula by college by HEGIS showing a list of curricula and enrollments for each community college campus in HEGIS order.

This report is a summary of the detailed curriculum enrollment printouts which are on file in the ICCB office. This summary attempts to present the highlights of these printouts. The detailed printouts of curriculum enrollment for each college were sent to the colleges and the curriculum enrollment by HEGIS for the State is available in the ICCB office.

Some colleges did not report enrollments in all curricula that they have approved to offer by the ICCB. The reasons for this are unclear in many cases. At some colleges, a career ladder concept is utilized whereby the students who complete a certificate can continue in school to work toward an associate degree. At these colleges, students in a given area of study are often reported as enrolled in the associate degree curriculum in that area although the college may have several certificate programs in that area. Also, there may have been no enrollments in that curriculum during the Fall 1976 term.

INTRODUCTION

The public community colleges of Illinois are indeed comprehensive in terms of their broad curricular offerings. During the 1976 Fall term (FY77), the thirty-nine community college districts (forty-nine individual campuses) reported a combined total of 2,959 educational curricula in 183 different fields of study. The enrollments for the Fall 1976 term in these curricula totaled 344,601 students. Table 1 below shows the distribution of the number of curricula and enrollments for the Fall 1976 term by instructional program area. The enrollment reported is the end-of-registration (10th day) cumulative enrollment for the Fall term and was obtained from the curriculum enrollment cards (Z-1 cards) submitted by the community colleges. The accuracy of the data is, hence, limited to the validity of these submissions. However, to insure valid data, printouts showing the edit run of the Z-cards and the curriculum enrollment reports by college were sent back to the community colleges for their verification and/or correction. Secondly, the cumulative enrollments which by definition must be equal to or greater than 10th day "snap-shot" enrollments were compared to the Fall term opening enrollments reported by the colleges. The 344,601 students reported in the cumulative count seems very much in line when compared to 325,830 reported in the "snap-shot" 10th day enrollment report.

Table 1

TOTAL NUMBER OF CURRICULA AND ENROLLMENT IN ILLINOIS PUBLIC COMMUNITY COLLEGES BY INSTRUCTIONAL PROGRAM AREA DURING THE FALL 1976 TERM

INSTRUCTIONAL PROGRAM AREA	NUMBER OF REPORTED CURRICULA		HEADCOUNT ENROLLMENT CUMULATIVE	
	NUMBER	PERCENTAGE	NUMBER	PERCENTAGE
Baccalaureate	578	20%	97,775	28%
Occupational/Career	2,043	69%	100,712	29%

TOTAL	2,959	100%	344,601	100%

SUMMARY OF CURRICULUM OFFERINGS AND CURRICULUM ENROLLMENTS BY COLLEGE

Table 2 on the next page shows a summary of the number of curricula reported and the enrollments for the Fall 1976 term in each of the community colleges of Illinois. The number of curricula are distributed by instructional program areas and by type of curricula (certificate or degree). The baccalaureate instructional area contains only two-year associate degree programs while the vocational skills and remedial/developmental areas contain only certificate programs.

The chart below shows the range in the number of curricula reported by the thirty-nine public community college districts* of Illinois.

SUMMARY OF CURRICULUM OFFERINGS AND ENROLLMENTS BY COMMUNITY COLLEGE DISTRICT, FALL 1976

	LOWEST	AVERAGE	HIGHEST
Number of Curricula	34	76	444
Number of Students Enrolled	1,347	8,836	108,782

* The thirty-nine districts includes three multi-campus institutions making a total of forty-nine campuses during the Fall 1976 term.

FALL 1976 CURRICULUM ENROLLMENT BY TYPE OF INSTRUCTIONAL PROGRAM IN ILLINOIS PUBLIC COMMUNITY COLLEGES

Table 3 on the following page shows a summary of curriculum enrollment by two-digit HEGIS program area. The two-digit HEGIS program area aggregates the various specific disciplines into more general categories. For example, the various botany and zoology disciplines are all included under the category of Biological Sciences (code 0400). These general categories provide an ideal method of summarizing the curriculum enrollments for the entire state.

The curriculum enrollments by type of instructional program area are evenly distributed with the baccalaureate curricula enrolling 97,775 students (28%), occupational/career curricula enrollment was 100,712 students (29%), general studies curricula enrollment was 33,563 students (10%), remedial/developmental curricula enrollment was 28,308 students (8%), and vocational skills curricula enrollment was 19,348 students (6%), based upon 10th day cumulative enrollment data reported by the community colleges. An additional 64,895 students (19%) were enrolled in the community colleges of Illinois but did not have a declared curriculum major.

A detailed listing showing all colleges that offer a given curriculum by discipline area is available in the Illinois Community College Board office but was not included in this report because of its volume. This report does enable one to identify the colleges that offer a particular program such as dental hygiene and is used for such purposes.

STATEWIDE ENROLLMENT BY CURRICULA IN ILLINOIS PUBLIC COMMUNITY COLLEGES DURING FALL 1976

Table 4 shows a listing by HEGIS classification taxonomy of the number of curricula reported during the Fall 1976 term in each discipline area, the number of different community colleges reporting each curricula, and the total number of students enrolled in all community colleges of Illinois in the curricula in each discipline area during the Fall 1976 term. Note that the count of colleges in each area is a duplicated count if one college offers more than one program in an area.

The total number of different HEGIS classifications (discipline areas) in which curricula were offered by Illinois public community colleges was 183. It must be noted that a HEGIS classification is fairly broad and often includes several distinctly unique curricula. For example, in the HEGIS classification "5306 Automotive Technologies", a variety of specialized certificate and degree curricula are offered in the community colleges of Illinois.

The list below shows the ten program areas enrolling the greatest number of students during the Fall 1976 term in Illinois public community colleges.

TEN PROGRAM AREAS WITH THE LARGEST ENROLLMENTS		NUMBER OF STUDENTS ENROLLED
4901	Baccalaureate Liberal Arts & Sciences	53,304
4999	Development and Preparatory Studies & Skills	28,308
4994	Development and/or Review of Vocational Skills	19,348
